PERSEROAN TERBATAS · AUTHORIZED DEALER WILO PUMP

About Us

PT Putri Langit Sukses is a company specializing in the distribution of Wilo-branded industrial and commercial pumps, while also providing integrated maintenance services for pumping and HVAC systems.

As an Authorized Wilo Dealer, we supply units and spare parts through official distribution channels and support customers throughout the entire process from pump selection and procurement to installation, testing & commissioning, and periodic maintenance.

We are more than just a product supplier. We serve as a technical partner, helping customers achieve systems that are properly selected, efficient, reliable, and sustainable.

Vision & Mission

Vision

To become Indonesia's leading Wilo pump dealer and the most trusted HVAC/AC maintenance service provider, driven by innovation, product quality, and service responsiveness.

Mission

- To provide original Wilo units and spare parts with official warranties.
- To deliver professional and timely technical services.
- To optimize energy efficiency in customers' water and HVAC systems.
- To develop technician expertise through continuous product training.

Our **Strengths**

01 AUTHORIZED DEALER	Wilo products are supplied through official distribution channels with principal support.
02 ORIGINAL PRODUCT & SPARE PART	Units and components are available through official channels and can be traced by serial number.
03 TECHNICAL EXPERTISE	Pump selection and handling are based on the system's technical requirements.
04 FAST RESPONSE	Our technical team helps minimize operational downtime.
05 ENERGY EFFICIENCY	Solutions are designed with energy consumption and system efficiency in mind.
06 ONE STOP SOLUTION	From procurement → installation → commissioning → maintenance, all through one trusted partner.
07 DOCUMENTED SERVICE	Every service is supported by service reports, test results, and follow-up recommendations.

WILO
Global Pumping Technology

Powered by Wilo

Wilo is a global manufacturer of pumps and pumping systems headquartered in Dortmund, Germany, offering solutions for Building Services, Water Management, and Industrial Applications.

In 2024, the Wilo Group recorded net sales of EUR 1,895.3 million and employed approximately 9,000 people worldwide.

Wilo operates production and sales companies in more than 50 countries, with manufacturing facilities across Europe, Asia, and America.

Global Production Network

Wilo manufactures pumps and pumping systems at 16 major production sites across Europe, Asia, and America. Additional locations in Sonneberg, Pohlheim, and Chemnitz, Germany; Sanford, Florida, USA; and Shanghai, China, develop specialized products for water supply, wastewater treatment, and flood control. Local assembly is also carried out in Brazil, Malaysia, Kazakhstan, and Saudi Arabia. With approximately 90 production and sales companies in more than 50 countries, this network helps maintain product availability and consistent quality for customers in Indonesia.

Wilo Indonesia

PT Wilo Pumps Indonesia was established in Jakarta in 2008 as a subsidiary of Wilo SE, Dortmund, Germany. The company is headquartered at Altira Business Park, North Jakarta, with representative offices in Palembang, Surabaya, and Balikpapan. After-sales services are supported by a workshop in Delta Silicon 8, Cikarang, Bekasi. The presence of the principal in Indonesia ensures that technical support, spare-part availability, and warranty handling can be accessed without relying on export-import channels.

Technology Focus

- EC/IE5 motors with low power consumption
- Smart control: constant pressure, constant ΔT, and load adaptation
- Bluetooth, Modbus, BACnet, and LonWorks connectivity
- Cartridge mechanical seals for faster maintenance
- Corrosion-resistant materials: cataphoretic-coated cast iron, SS 304/316

Commonly Applicable Certification

- NSF/ANSI 61 & 372 for drinking-water contact
- UL Listed for packaged pumping systems
- UL/FM for fire protection pumps
- IP68 for submersible units
- FM explosion-proof certification for selected sewage pump series

Product Solution

Complete Pumping Solutions for Every Application

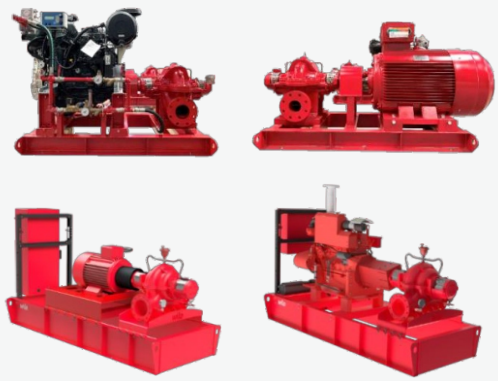

Sistem HVAC

Plumbing System

Drainase & Limbah

Fire Fighting System

The following summary is provided as an initial reference for product selection. The stated capacity and head values represent the maximum limits of each series, not the actual operating points. Actual operating points are determined through system-curve calculations during the technical quotation stage.
Metric values are converted from manufacturer data using the following conversions:
1 GPM = 0.2271 m^3/h
1 ft = 0.3048 m

Our Services

Pump Service & Overhaul

Our pumping system maintenance and repair services include:

- Motor rewinding
- Mechanical seal replacement
- Bearing replacement
- Shaft alignment
- Impeller balancing
- Performance testing

HVAC & AC Services

- Preventive maintenance
- Chemical cleaning
- Compressor repair
- Refrigerant charging
- Airflow balancing

Central AC / VRV / VRF

- Troubleshooting
- Indoor & outdoor maintenance
- Control board inspection
- Energy optimization

Installation & Commissioning

- Pump installation
- Pump–motor alignment
- Panel & VFD setup
- Flow & pressure testing
- Handover documentation

Retrofit & Energy Efficiency

Replacement of existing pumps with high-efficiency units, combined with system optimization based on actual operating loads.

Industries & Applications

Building & Property

- High-rise buildings
- Apartments
- Hotels
- Shopping malls
- Property management

Applications: Chilled Water | Booster | Transfer Water | Drainage | HVAC

Energy & Heavy Industry

- Power Plant
- Mining
- Petrochemical
- Palm Oil Mill

Applications: Vertical Turbine | Cooling | Process Water | Fire Protection | Wastewater

Healthcare

- Hospitals
- Medical facilities

Applications: Domestic Water | HVAC | Booster | Sewage

Manufacturing & Industrial

- Factories
- Industrial estates
- Food & beverage
- Chemical & processing

Applications: Process Water | Cooling Water | Transfer | Booster

Water & Wastewater

- WTP
- STP
- IPAL
- Drainage
- Flood Control

Solusi **Terintegrasi**

From Selection to After-Sales Support

We provide integrated solutions through a single service partner:

01
CONSULTATION
Understanding the system's requirements and operating conditions.

02
PUMP SELECTION
Selecting pumps based on flow rate, head, fluid characteristics, and system requirements.

03
PROCUREMENT
Procuring units and spare parts through official distribution channels.

04
INSTALLATION
Pump installation and pump–motor alignment.

05
TESTING & COMMISSIONING
Testing system flow rate, pressure, and functionality.

06
MAINTENANCE
Preventive maintenance and periodic servicing.

07
AFTER SALES
Spare parts, warranty support, and technical assistance.

This approach enables customers to manage their unit, installation, service, and maintenance needs through a single trusted partner.

Company **Values**

1. **ORIGINALITY**
   Products and spare parts are supplied through official distribution channels.
2. **TECHNICAL ACCURACY**
   Pump selection is based on system requirements, flow rate, head, NPSH, and system curves.
3. **FAST RESPONSE**
   Quick response to help reduce operational downtime.
4. **ENERGY EFFICIENCY**
   Considering long-term efficiency and energy consumption.
5. **TRANSPARENCY**
   Every project is supported by service reports, test results, and recommendations.

LET'S BUILD A MORE EFFICIENT SYSTEM
